EXPERIENCE

Generative AI Engineer

Oct 2025 – Jun 2026

Finkraft

Bengaluru, Karnataka

- Deployed **ChandraOCR v2** on **RunPod** GPUs via **vLLM** for parsing **millions of documents** at production scale; built an async server with continuous batching, then routed OCR output to **Qwen** for structured field extraction—improving data parsing accuracy from **30% to 99%**.
- Designed the **orchestration layer** for an agentic email triage system using **LangGraph**; LLM autonomously fetches GST and invoice context via external APIs, classifies intent, and routes to resolution or human escalation.
- Engineered a **Text-to-SQL agent** over **PostgreSQL**; implemented tool-calling to translate natural language queries into executable SQL and generate Plotly visualizations in a sandboxed environment.
- Built a document Q&A assistant with citation-grounded responses for internal PRD generation; applied re-ranking and source attribution to keep answers verifiable and hallucination-free.

Generative AI Engineer Intern

Jul 2025 – Aug 2025

Duco Consultancy

Gurugram, Haryana

- Built an **AI Agent** with **RAG** over patient records for a hospital management platform; implemented role-based retrieval to ensure LLM responses stayed scoped to authorized records.
- Integrated **agentic tool-use** with wearable device APIs to automate health metric ingestion and appointment scheduling, reducing manual data entry workflows.

PROJECTS

Multi-LLM RAG Assistant with Vector Search

2026

- Built a knowledge-base chatbot with a swappable backend across **OpenAI, Anthropic, and Gemini APIs**; used **Pinecone** for retrieval, with re-ranking to reduce hallucinations and live provider switching for side-by-side demos.

AI Data Analyst Bot

Oct 2025 – Nov 2025

- Converts natural language queries into executable Python/SQL with Plotly visualizations; engineered the tool-selection and code execution logic to run safely in a sandboxed environment with error recovery.

Conversational Agent with Voice & Channel Integration

2026

- Designed a multi-channel (Telegram/WhatsApp) conversational agent with **voice I/O** and **agentic tool-use** for appointment booking and FAQ resolution; deployed with a public demo link for live walkthroughs.

EDUCATION

Chandigarh Engineering College

Chandigarh

Bachelor of Technology

2021 – 2025

Kendriya Vidyalaya IIM Lucknow

Lucknow

Physics, Mathematics and Computer Science

2019 – 2020

TECHNICAL SKILLS

LLM APIs & Agent Frameworks: OpenAI, Anthropic, Gemini APIs, LangChain, LangGraph, Tool-Use / Function Calling, Agentic Workflows, Prompt Engineering, RAG

Inference & LLMops: vLLM, RunPod, Hugging Face, Ollama, Continuous Batching, KV-Cache Tuning, Tensor Parallelism

RAG & Vector Search: FAISS, Pinecone, Graph RAG, Multimodal LLMs, Re-ranking, Source Attribution

Languages & Frameworks: Python (Expert), SQL (Postgres), Bash/Shell, PyTorch, scikit-learn, pandas, NumPy, Plotly, FastAPI, Streamlit

Cloud & Infra: GCP (Vertex AI), AWS (S3, Lambda), Docker, MongoDB, PostgreSQL, Git, REST APIs

Concepts: PoC-to-Demo Conversion, Solution Architecture, LLM Serving, NLP, Hallucination Reduction, Model Evaluation
